

## Cloth Diapering 101: Setting the Record Straight

MYTH	TRUTH
<b>Cloth diapers are difficult to use and are inconvenient to care for and wash</b>	FuzziBunz simply snap on and off your baby. Just shake off soiled diapers over the toilet and wash in your washing machine. No fuss. No mess. Everything you need to diaper your baby is in your home, where it should be.
<b>Cloth diapers are expensive</b>	Not true! FuzziBunz can save a family \$2,000+ over the course of several years and even several babies.
<b>Cloth diapers have pins that poke and plastic pants that may irritate my baby's skin</b>	Reusable diapers have come a long way. FuzziBunz are made with super soft fleece and easy-to-use snaps. No pins and no plastic pants – ick!
<b>Cloth diapers are not environmentally friendly because you have to use extra water to wash them</b>	To manufacture a disposable diaper, many natural resources such as wood, water, energy and oil are needed over and over again. And then when the diapers are tossed, a trash man comes to haul it away, using more energy. Remember, water is renewable and most washer and dryers are energy efficient. We wash our dishes and clothes rather than toss them when they're dirty. That's because the real eco-friendly method involves reusing, not trashing.
<b>Cloth diapers don't control night time leaks</b>	FuzziBunz offer an adjustable, snug fit around the legs and waist to deter leaks. The patented pocket design enables you to customize absorbency for times (i.e., at night) when babies need more leak protection.
<b>Cloth diapers don't keep your baby dry</b>	The FuzziBunz patented pocket design means that wetness seeps through the top fleece layer and is absorbed by the inner micro-terry pad.
<b>Cloth diapers are bulky and ugly</b>	FuzziBunz offers a trim fit that comes in a one-size and perfect sized options.
<b>Cloth diapers are unsanitary</b>	Because you can remove the micro-terry pad insert from the FuzziBunz diaper, you can ensure that each layer gets extra clean with each wash. No swirling, soaking or dunking diapers like old-fashioned diapers of yesteryear.
